DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/04/2006 has been entered.

2. This application is in condition for allowance except for the following formal matters:

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the (1) recited plurality of successively arranged suction heads for high items of claim 14 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

Art Unit: 3653

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

More specifically, applicant first submitted a drawing showing the suction heads set forth in claim 14 on 7/21/2005, which was approved. With the next response, applicant submitted another drawing showing the drive control device of claim 1 on 12/22/2005. While this later drawing showed the drive control device of claim 1, this later drawing failed to show the suction heads of claim 14. Thus, applicant should submit a drawing including both the drive control device and the suction heads.

Claim Objections

4. Claims 9 and 16 are objected to because of the following informalities: (a) "friction/suction-type" in line 1 of claim 9 should be -- friction/suction --; (b) "at least one friction-type" in line 6 of claim 9 should be -- at least one friction --; and (c) "a friction-type withdrawal means" in lines 2-3 of claim 16 should be -- the friction withdrawal means --. Appropriate correction is required.

Allowable Subject Matter

5. Claims 9-12 and 14-16 would be allowable if amended to overcome the claim objections outlined above.

Conclusion

6. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
